

# Page not found (404)

**Request Method:** GET

**Request URL:** <https://tilshunos.com/ommonims/2>

Using the `URLconf` defined in `config.urls`, Django tried these URL patterns, in this order:

1. `asr/`
2. `accounts/`
3. `accounts/`
4. `omonims/`
5. `sinonims/`
6. `paronims/`
7. `quizes/`
8. `morphems/`
9. `project/` [`name='project'`]
10. `authors/` [`name='authors'`]
11. [`name='home'`]
12. `^static/(?P<path>.*)$`

The current path, `ommonims/2`, didn't match any of these.

You're seeing this error because you have `DEBUG = True` in your Django settings file. Change that to `False`, and Django will display a standard 404 page.
